SX.e Samples ReadMe Document

The sxe-10x-samples folder includes this readme.txt file and 2 folders.

The sample-input folder includes the sample input files that were used to create the pdf samples found in the sample-output folder mentioned below.

The sample-output folder includes sample pdfs created from the input samples in the sample-input folder mentioned above, using the base rule file mentioned below.

If your only purpose is to view the sample pdf files, then the zip file downloaded can be unzipped anywhere. If your purpose is to view the enhancing code that created the pdf files, then the zip file downloaded needs to be installed in the UnForm install folder (sdsi\uf90\server on Windows). Then use the v9.0 browser-based designer to view the enhancing code.

Base Rule file: sxe-10x-v90.rul
